

Critical Incident Stress Management (CISM) Team

Critical incident stress management team (CISM) is a structured discussion of a significant traumatic event/critical incident. A critical incident stress debriefing is a supportive, crisis-focused tool that is used by a specially trained team after an individual or group has encountered a traumatic experience. The Grays Harbor EMS office is proud to sponsor a CISM Team that includes individuals from a variety of agencies (fire, police, religious organizations, etc.). If you would like to contact the team please contact Roger at 360-250-4563 or Cheryl at 360-581-2201.
